

SUMMARY

to the Base Prospectus for the Programme for the Offering of Bonds of UAB REFI Sun in the amount of up to EUR 25,000,000 and Admission of the Issued Bonds to Trading on the First North Bond List, and

to the Final Terms for Tranche 1 of these Bonds

Introduction and Warnings	
<p>This summary (the Summary) is prepared in accordance with Article 7 of the Prospectus Regulation and should be read only as an introduction to the prospectus (the Prospectus). Any decision to invest in the Bonds should be based on consideration of the Prospectus as a whole by the investor. Where a claim relating to the information contained in the Prospectus is brought before a court, the plaintiff investor might, under the national legislation of the relevant Member State of the EEA, have to bear the costs of translating the Prospectus before the legal proceedings are initiated; and civil liability attaches only to those persons who have tabled the Summary, including any translation thereof, but only if the Summary is misleading, inaccurate or inconsistent when read together with the other parts of the Prospectus or it does not provide, when read together with the other parts of the Prospectus, key information in order to aid investors when considering whether to invest in such securities. Investing in the Bonds involves risk and the investor may lose all or part of the capital invested.</p>	
<p>Name and International Securities Identification Number (ISIN) of the Bonds</p>	<p>Tranche 1 of up to EUR 15,000,000 of UAB REFI Sun issue of up to EUR 25,000,000 Bonds due 2028, registered with Nasdaq CSD under ISIN code LT0000134702.</p>
<p>Identity and contact details of the issuer, including its legal entity identifier (LEI)</p>	<p>The Issuer's business and legal name is UAB REFI Sun (hereinafter referred to as the Company or the Issuer). The Company is registered in the Register of Legal Entities of the Republic of Lithuania with the code 307149494. The Company's contact details are as follows: address Gynėjų g. 14, Vilnius, Lithuania, telephone +370 612 40913, e-mail: linas.tomkevicius@invl.com. The Company's LEI is 6488C41128L4F36MBP27.</p>
<p>Identity and contact details of the competent authority that approved the Prospectus, date of approval</p>	<p>The Bank of Lithuania in its capacity as the competent authority in Lithuania under the Prospectus Regulation on 17 June 2025 has approved the Prospectus. The Bank of Lithuania has notified the approval of the Prospectus to the Latvian Financial Supervisory Authority (in Latvian: <i>Latvijas Banka</i>) and the Estonian Financial Supervision and Resolution Authority (in Estonian: <i>Finantsinspektsioon</i>).</p>
Issuer	
Who are the issuer and the guarantor of the securities?	
<p>Issuer's legal and commercial name/ legal form/country of incorporation/domicile</p>	<p>UAB REFI Sun The company is incorporated and operates under the laws of the Republic of Lithuania as a private limited liability company for an unlimited period, legal entity code 307149494, LEI 6488C41128L4F36MBP27.</p>
<p>Guarantor's legal and commercial name/ legal form/country of incorporation/domicile</p>	<p>INVL Renewable Energy Fund I The Guarantor is a closed-end sub-fund of INVL Alternative Assets Umbrella Fund for informed investors, managed by INVL Asset Management UAB, legal entity code 126263073, registered address Gynėjų g. 14, Vilnius, Lithuania (the Management Company).</p>
<p>Principal activities</p>	<p>The Issuer is a special purpose vehicle company, wholly owned by the Guarantor and created for the sole purpose of the issuance of the bonds to finance activities of the Guarantor and its directly and indirectly controlled subsidiaries (the Group). The Guarantor, together with the Group, focuses on the development and investments in renewable energy assets, primarily ready-to-build and construction stage solar projects in Romania and Poland.</p> <p>The Guarantor's and the Group's activities include but are not limited to (i) the acquisition of power plants project rights, (ii) the construction of new power plants, (iii) the development and/or acquisition of infrastructure necessary for the operation of power plants, and (iv) the efficient management of existing power plants. Investment</p>

	returns will be generated by (i) receiving revenues from the sale of the energy produced by the renewable energy facilities (power plants) controlled by the Guarantor, and (ii) increasing the value and disposal of these facilities and their associated infrastructure to the third parties.
Major shareholders	The control of the Issuer is exercised by the sole shareholder of the Issuer. The Guarantor owns 1,000 shares of the Issuer constituting 100% of authorised share capital and voting rights of the Issuer. No individual investor owns 25% or more of the investment units of the Guarantor.
Key managing directors	Mr. Linas Tomkevičius is the General Manager of the Issuer. The company has no other management bodies. The Guarantor as a fund is managed by the Management Company. In addition, in order to ensure the efficiency of the Guarantor's as sub-fund's activities and investments, the Management Company has formed the Investment Committee which consists of 2 (two) investment decision-makers, who are also employees of the Management Company – a Managing Partner Liudas Liutkevičius and a Partner Linas Tomkevičius. The Management Company has a two-tier management system, i.e., the Chief Executive Officer (CEO) and the Management Board. The Management Company's CEO is Andrius Načajus. The Management Board of the Management Company consists of 3 Board members: (i) Vytautas Plunksnis (Chairman), (ii) Darius Šulnis, and (iii) Asta Jovaišienė.
Statutory auditors	Since the Issuer has been established on 18 April 2025, only unaudited financial statements, reflecting the establishment of the Issuer, are presented. The annual financial statements of the Guarantor for the years ended 31 December 2022 and 31 December 2023 as well as interim financial statements for the twelve months periods ended 31 December 2024 were prepared in accordance with the IFRS. The annual financial statements of the Guarantor for the years ended 31 December 2022 and 31 December 2023 were audited by KPMG Baltics UAB, legal entity code 111494971, address at Lvivo g. 101, Vilnius Lithuania, tel. +370 5 2102 600, audit license number 001506. The audit for the years 2022 and 2023 was executed by auditor Toma Jensen, auditor's licence No 000635.

What is the key financial information regarding the issuer and the guarantor?

Selected financial information of the Company and the Guarantor is provided in the tables below. Audited Annual Financial Statements and unaudited Interim Financial Statements are incorporated by reference into the Prospectus (they may be found on the Issuer's and Guarantor's website <https://www.invl.com/en/investments/invl-renewable-energy-fund-i>). Unless stated otherwise, the information of this Section below should be read in conjunction with, and is qualified in its entirety by reference to, such financial statements and related notes.

There were no qualifications in the auditor's reports on the Guarantor's Annual Financial Statements for the years ended 31 December 2022 and 31 December 2023.				
What are the key risks that are specific to the issuer and the guarantor?				
Risks Related to the Financial Situation of the Issuer and the Guarantor				
Changes in Issuer's financial standing				
<p>The Issuer is a newly established limited liability company with a minimum share capital of EUR 1,000 and no accumulated reserves. Any adverse change in its financial condition or prospects may have a material adverse effect on liquidity of Bonds, which may lead to decrease of market price of Bonds or could negatively impact its ability to fully redeem the Bonds, potentially resulting in the investors' losing a part or all of the invested funds. The Issuer deems this risk factor to be of high relevance.</p>				
Economic environment and financial situation				
<p>The Issuer's and Guarantor's business are influenced by macroeconomic conditions in the markets in which they operate (namely, Romania and Poland), including energy price volatility, geopolitical tensions (e.g. the Russia-Ukraine war), and global supply-chain disruptions such as those experienced during COVID-19. Such macroeconomic trends in the countries in which the Issuer and the Guarantor operate, and in Europe more broadly, have a significant impact on the Issuer's and the Guarantor's business and financial position and any negative macroeconomic trends could have a material adverse effect on the Issuer's and the Guarantor's business, financial condition, results of operations or prospects. Accordingly, such factors may delay project development, increase costs, and adversely affect financial performance. The Issuer deems this risk factor to be of medium relevance.</p>				
Dependency on external financing sources				
<p>The Guarantor and its SPVs plan to finance part of their capital expenditure through bank borrowings, expecting to raise EUR 105 million of debt in 2025-2026. Based on leverage as of 31 December 2024, the maximum additional allowed financial leverage is EUR 184.8m. In 2024, investor-approved amendments to the Guarantor's Rules increased maximum leverage from 300% to 500% under both gross and commitment methods, in line with Regulation (EU) No 231/2013 of 19 December 2012. As of 31 December 2024, financial leverage of the Guarantor</p>				

was at 187.96% (gross method) and 228.64% (commitment method). The financial leverage limits were not exceeded in 2024. Following the Bond issue, leverage would rise to 230.17% and 313.17%, respectively.

Access to financing is subject to external factors (e.g. economic conditions, regulatory changes), and financial covenants may limit borrowing capacity. Failure to secure financing on acceptable terms could impact investment plans and operations of the Guarantor and its SPVs. Higher debt levels may also increase sensitivity to market and revenue fluctuations, constrain strategic options, and raise the risk of covenant breaches or late payments. Such disruptions could adversely affect business performance. The Issuer considers this risk factor to be of medium relevance.

Currency exchange risks

The Guarantor and its SPVs operate in Romania and Poland, which are not Eurozone countries and their currencies fluctuate relative to euro. Accordingly, all revenues and certain transactions are denominated in local currencies. Fluctuations in exchange rates against the euro may reduce the euro-equivalent value of revenues, shareholder loans, and asset sale proceeds. Additionally, equipment purchases in foreign currencies may become more costly if local currencies weaken. These factors may negatively impact financial performance of the Guarantor and its SPVs. The Issuer deems this risk factor to be of medium relevance.

Risk of increase of expenditures due to inflation

Periods of high inflation, such as in 2022–2023, may recur and significantly raise costs related to equipment, labour, and other operational expenses. Rising inflation may limit the Issuer's and the Guarantor's ability to increase the prices of their products or services to maintain profit margins, potentially leading to higher losses. If they are unable to pass increased costs onto customers, they may need to cover these from internal resources. Prolonged or strong inflation could therefore have a material adverse impact on their financial position and operating results. This risk is considered of low relevance by the Issuer.

Risks Related to the Business Activities of the Issuer and the Guarantor

Electricity market fluctuation risk

The Guarantor, through its SPVs, invests in renewable energy projects and is exposed to electricity market fluctuations, which may reduce revenue and asset value. Rising interest rates and limited financing may also reduce buyer activity and increase seller pressure, potentially lowering asset prices and liquidity. This could hinder the Guarantor's ability to sell assets and meet its obligations under the Guarantee. The Issuer deems this risk factor to be of high relevance.

Risks related to development of renewable energy business

The Guarantor and its SPVs operate in a capital-intensive industry and plan substantial investments in the short- and medium-term to develop their project portfolio. Any new projects will require additional funding, which may not be available on acceptable terms, if at all.

Execution of their strategy depends on identifying and assessing opportunities, securing financing, managing costs, and maintaining effective controls. Capital expenditure decisions rely on forecasts of production, electricity prices, and interest rates, which may prove inaccurate, affecting investment viability. Development projects may require higher-than-expected investment or face various challenges.

New facilities may underperform due to equipment degradation, outages, or system failures, leading to delays and higher costs. This may reduce project competitiveness and lead to variance from expected capital needs.

Projects may be delayed, scaled down, sold, or rejected and the Guarantor and its SPVs may not pursue all of the opportunities and projects that it is currently considering. This may adversely affect the Guarantor's and its SPVs' ability to execute its investment plan and growth strategies. In addition, failure to meet completion deadlines may result in the loss of applicable subsidies, grid connections or project rights. These risks may adversely affect the Guarantor's and its SPVs' financial condition, debt obligations, results of operations and prospects. The Issuer deems this risk factor to be of medium relevance.

Risks related to inability to complete projects under construction

The Guarantor and its SPVs may not be able to complete projects under construction. Projects under development and construction face various risks, including engineering issues, equipment supply delays, and contractor performance shortfalls. Failure to complete construction on time may lead to defaults, financial penalties, asset impairments, loss of subsidies, or reduced eligibility periods. Delays may also trigger litigation or disrupt financing arrangements. Common risks include contractor defaults, unforeseen events (e.g. pandemics, war), equipment damage, software malfunctions, adverse weather, theft, and regulatory hurdles. Additionally, technical defects or contamination in completed assets may require costly repairs, negatively impacting the Issuer's financial state and cash flows. The Issuer considers this risk factor to be of medium relevance.

Asset liquidity risk

Renewable energy assets can be relatively illiquid due to their properties, which may limit the Guarantor's ability to sell or transfer them quickly or at the desired price. Unfavourable market conditions at the time of sale could negatively affect the value of SPV shares or other assets, impacting the Guarantor's ability to meet its obligations under the Guarantee. Since repayments of the loans issued from Bonds' proceeds is expected to come from asset deals including the sale of SPV's shares, failure to secure such deals at favourable conditions will impact the ability of the Issuer to redeem the Bonds on time. The Issuer deems this risk factor to be of medium relevance.

Inadequate insurance

The SPVs, controlled by the Guarantor, are developing, building and operating renewable energy assets in Poland and Romania and are required to insure risks related to construction and operations. However, insurance coverage may not fully compensate for losses from hazards such as fire, equipment failure, or natural disasters. These events can cause serious damage, operational disruptions, or legal liabilities. While warranties and performance guarantees offer some protection, they may not cover all losses or costs. Any uninsured or underinsured damages could negatively impact the Guarantor's activities, financial state and cash flows. The Issuer deems this risk factor to be of medium relevance.

Compliance with legal acts

which are operating in renewable energy sectors in Romania and Poland, are required to comply with large number of laws and highly complex regulations in these countries relating, but not limited to operational procedures and quality standards. Requirements are rapidly changing and non-compliance may lead to administrative penalties, fines, or legal proceedings – even for minor infringements. While internal policies of SPVs and the Guarantor aim to ensure compliance, the risk cannot be fully eliminated. Any material breach could result in serious financial consequences for SPVs and/or the Guarantor and negative impact on Issuer's and/or the Guarantor's reputation. The Issuer deems this risk factor to be of low relevance.

Tax risk

Changes in economic conditions or government policy may lead to increased taxes on land, real estate, VAT, or profits. The Guarantor currently benefits from a corporate income tax exemption in Lithuania as a collective investment undertaking (CIU), but proposed tax reforms may revoke this status, negatively impacting its financial position. Additionally, the Guarantor could be adversely affected by challenges to its transfer pricing arrangements. Noncompliance with transfer pricing regulations (including due to insufficient documentation), could result in material adverse effects to the Guarantor's business, results of operations, financial condition and reputation. The Issuer deems this risk factor to be of low relevance.

Regulatory and Governance Risks

Dependence on the Management Company

The Guarantor relies on the Management Company for strategic decisions, daily operations, and implementation of its investment policy. Any disruption, such as the loss of the Management Company's license or its replacement, could negatively impact the Guarantor's operations and financial results, affecting its ability to meet obligations to the Bondholders. The Issuer, being a special purpose vehicle, established by the Guarantor, and with only two employees (Managing Director and accountant) who are also employees of the Management Company, is highly dependent on the guidance of the Management Company. The Issuer deems this risk factor to be of medium relevance.

Risk of Revocation of the Activity Licence

The Guarantor and the Management Company are regulated by the Bank of Lithuania. Subject to legal requirements, their licenses may be revoked if they no longer meet legal requirements or are deemed unable to fulfil their obligations. Loss of the Guarantor's license would result in the termination of its activities as a collective investment undertaking, potentially affecting its ability to meet obligations under the Guarantee. The Issuer considers this risk factor to be of low relevance.

Key information on the securities

What are the main features of the securities?

<p>Type, class and ISIN of securities</p>	<p>Secured non-convertible non-subordinated Bonds of the Company – debt securities with a fixed-term under which the Company shall become the debtor of the Bondholders and shall assume obligations for the benefit of the Bondholders. The Bonds may not be converted into ordinary shares or other instruments of ownership of the Issuer.</p> <p>ISIN of the Bonds: LT0000134702.</p>
---	---

<p>Currency, denomination, par value, number of securities issued and the term of securities</p>	<p>Currency of the Issue – EUR</p> <p>Redemption date: the Bonds shall have the maturity of 2.5 years starting from the First Issue Date. Therefore, the Maturity Date of all Tranches shall be 19/02/2028.</p> <p>The number of the Bonds to be issued under Tranche 1: up to 15,000.</p> <p>Nominal value of the Bond - EUR 1,000. Tranche 1 issue price of the Bonds – EUR 1,000; Tranche 1 yield – 8.5%. Total nominal amount of the Bonds to be issued under Tranche 1: up to EUR 15,000,000.</p> <p>Annual interest rate of the Bonds: 8.5%.</p>
<p>Description of the rights attached to securities</p>	<p>As from the Maturity Date of the Bonds, Bondholders shall have a right to receive from the Company the nominal value of the Bonds and the interest accrued and unpaid to dates, as indicated above, i.e. he/she/it shall have a right to require, that the Bonds would be redeemed for their redemption price.</p> <p>Bondholders shall have the rights provided in the Law on Protection of Interests of Bondholders, the Civil Code, the Law on Companies, and other laws regulating the rights of Bondholders, as well as the rights specified in the respective decision to issue Bonds. The Bondholders shall have the following main rights:</p> <ul style="list-style-type: none"> (i) to receive the cumulative interest accrued quarterly; (ii) to receive the nominal value of Bonds and the cumulative interest accrued and not yet paid on the Maturity Date of the Bonds; (iii) to sell or transfer otherwise all or part of the Bonds; (iv) to bequeath all or part of owned Bonds to the ownership of other persons (applicable only towards natural persons); (v) to participate in the Bondholders' Meetings; (vi) to vote in the Bondholders' Meetings; (vii) to initiate the convocation of the Bondholders' Meetings following the procedure and in cases provided for in the Law on Protection of Interests of Bondholders; (viii) to adopt a decision to convene the Bondholders' Meeting following the procedure and in cases provided for in the Law on Protection of Interests of Bondholders; (ix) to obtain the information about the Issuer, the Guarantor, the respective issue of Bonds, or other information related to the protection of his/her/its interests; (x) to receive from the Trustee a copy of the contract concluded between the Issuer and the Trustee; (xi) other rights, established in the applicable laws. <p>The rights of the Bondholders shall be executed during the term of validity of the respective Bonds (from the Issue Date until the Maturity Date) according to the order, indicated in this Base Prospectus, the Final Terms and the applicable Lithuanian laws.</p>
<p>Relative seniority of the securities in the issuer's capital structure in the event of insolvency</p>	<p>The Bonds to be issued under the Base Prospectus are secured by the guarantee issued by the Guarantor on 16 June 2025.</p> <p>The Bonds constitute direct, guaranteed obligations of the Issuer, ranking <i>pari passu</i> without any preference among each other.</p>
<p>Restrictions on transferability of the securities</p>	<p>There are no restrictions on transfer of Bonds as they are described in the applicable Lithuanian laws. However, the Bonds cannot be offered, sold, resold, transferred or delivered in such countries or jurisdictions or otherwise in such circumstances in which it would be unlawful or require measures other than those required under Lithuanian laws, including, without limitation, in the United States of America, Australia, Canada, Hong Kong and Japan.</p>
<p>Where will the securities be traded?</p>	

The Bonds shall be applied for introduction to trading on the First North Bond List at Nasdaq Vilnius First North once the Bonds of the respective Tranche are subscribed and fully paid by the Investors and registered with Nasdaq CSD. In case not all the Bonds of the respective Tranche are subscribed and/or fully paid by the Investors, the General Manager of the Issuer may decide to issue and introduce to trading on the First North Bond List any lesser number of Bonds.

What are the key risks that are specific to the securities?

Risks Related to the Nature of the Bonds:

Early redemption risk

According to the terms of the issuance, the Bonds may be redeemed prematurely on the initiative of the Issuer. If the early redemption right is exercised by the Issuer, the rate of return from an investment into the Bonds may be lower than initially anticipated. Also, the Bondholders might not have the option to invest in financial instruments offering similar risk/return characteristics at the time of the early redemption, or could face additional costs in selecting a new investment. The Issuer considers this risk factor to be of medium relevance.

Credit and default risk

The Issuer's and Guarantor's ability to repay the Bonds depends on cash flows from SPVs and the successful sale of these assets. Bond repayment is expected to be funded primarily from sale proceeds. Failure to sell SPVs at sufficient prices may lead to default. Credit risk includes the potential insolvency or bankruptcy of the Issuer or Guarantor, which could prevent repayment of principal and interest. Legal protection proceedings may also result in partial or total loss for investors. An Investor is always solely responsible for the economic consequences of its investment decisions. The Bonds are direct, secured, and guaranteed obligations of the Issuer, ranking *pari passu*. No state guarantee applies. Issuer considers this risk factor to be of medium relevance.

Price risk

The issue price of the Bonds may differ from their nominal value, and their market value may fluctuate over time. Even without changes in the Issuer's or Guarantor's actual creditworthiness, negative market sentiment or shifts in the broader perception of corporate debt can reduce demand and lower Bond prices. Rising interest rates may also decrease the value of existing fixed-rate Bonds. The Issuer considers this risk factor to be of medium relevance.

Validity of limitation on incurring additional debt

Although the Issuer is subject to limitations on incurring further debt, it may still do so if special undertakings are respected. Any new debt ranking *pari passu* with the Bonds would increase the number of creditors sharing in insolvency proceeds, potentially reducing recoveries for Bondholders. Contractual provisions which confers, purports to confer, or waives a right to create security interest in favour of third parties, such as negative pledges, are not enforceable against third parties in Lithuania. There is no legislation granting such provisions preferential status, nor a registry to publicize them. As a result, if the Issuer grants security to a third party in breach of such undertakings, that security may still be valid and enforceable. The Issuer considers this risk factor to be of low relevance.

Transaction costs/charges

When the Bonds are purchased/subscribed or sold, several types of incidental costs (including transaction fees and commissions) are incurred in addition to the purchase/issue or sale price of the Bonds. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including but not limited to domestic dealers or brokers in foreign markets, Bondholders may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third party costs). These incidental costs may significantly reduce or eliminate any profit from holding the Bonds. The Issuer deems this risk factor to be of low relevance.

Offering and Admission Related Risks

Liquidity, listing and inactive secondary market risk

The Bonds constitute a new issue of securities by the Issuer, and although application will be made for their admission to trading on Nasdaq Vilnius First North, there is no guarantee it will be accepted. Even if admitted, this does not ensure a liquid or active secondary market. Neither the Issuer, the Arranger, nor the Managers are obliged to maintain such a market. If no active market develops or is maintained, the Bonds' liquidity and market price may decline. Prices may also be affected by broader market and economic conditions, the Issuer's financial standing, and other external factors, possibly resulting in Bonds trading at a discount. Investors may not be able to sell their Bonds at a desirable price or at all. The introduction of competing instruments could further reduce the market price and value of the Bonds. The Issuer deems this risk factor to be of high relevance.

Risks Related to Performance on the Guarantee

Risk of subordination to secured claims

The Bonds are secured only by the Guarantee issued by the Guarantor, with no additional third-party collateral. In the event of insolvency, assets of the Issuer or Guarantor would first be used to satisfy secured creditors. Therefore, there is a risk that in such an event, the assets of the Company may not be sufficient to pay the Bondholders. The Issuer deems this risk factor to be of low relevance.

Key information on the offer of securities to the public and/or the admission to trading on a regulated market**Under which conditions and timetable can I invest in this security?**

The subscription period for Tranche 1 of the Bonds will take place from 28/07/2025 9:00 until 18/08/2025 14:30 (Vilnius time) (the **Subscription Period**). The investors wishing to subscribe/purchase the Bonds shall submit their orders to acquire the Bonds at any time during this subscription period.

The Offering will take place in the form of an auction of the Bonds organized through Nasdaq Vilnius. In order to subscribe for the Bonds, the Investor must have a securities account with a member of the Nasdaq Vilnius trading system (the **Exchange Member**) and fill in a subscription order (the **Subscription Orders** or **Subscriptions**) form provided by the Exchange Member during the Subscription Period. The Subscription Orders shall be submitted by means accepted and used by the Exchange Members (e.g. physically, via the internet banking system and/or by any other available means).

Total amount of the Bonds to be acquired and indicated in each Subscription Order shall be for at least 1 Bond.

The decision on allocation of the Bonds of Tranche 1 shall be passed on 18/08/2025. In respect of the offering of the Bonds of the Tranche 1, only Subscription Orders which are at or below the set final Interest Rate (coupon) will be subject to allocation. If more than one preferred annual interest rate (coupon) levels indicated in the Subscription Order are subject to allocation, the largest Subscription Order amount will be used for allocation purpose.

By submitting a Subscription Order each Investor shall authorize and instruct the Exchange Member through which the Subscription Order is submitted to immediately block the whole subscription amount on the Investor's cash account connected to the securities account of the Investor until the settlement is completed or funds are released in accordance with terms and conditions, indicated in this Prospectus, the Final Terms and the auction rules of Nasdaq Vilnius First North. In respect of the offering of the Bonds of the Tranche 1, when the Issuer offers the Bonds for a fixed annual interest rate within a range as specified in the Prospectus and the Investor has placed Subscription Orders at different preferred annual interest rates, the total transaction amount to be blocked will correspond to the largest investment amount (in EUR) payable per Investor's offered preferred annual interest rate level.

The specific amount to be paid by the Investor for allocated Bonds is calculated by multiplying the number of allocated Bonds to Investor by the Issue Price per Bond. Bank charges or any other charges, including any applicable commissions of the relevant market institutions, relating to the payment of the subscription price shall be borne separately by the Investors. Such charges cannot be quantified by the Company or the Arranger.

The Investors who have not been allotted any Bonds or whose Subscriptions have been reduced will receive reimbursements of the payment made upon placing the Subscription Order (or the blocked funds will be released) in accordance with instructions provided by each such Investor, as required under the procedures applicable in the investment firm with which the Subscription Order was placed.

Any decision on cancellation, suspension, postponement or changes of dates of the Offering will be published in a manner compliant with applicable regulations, as well as market practices in Lithuania.

Why is this prospectus being produced?

This Base Prospectus is designated for (i) public offering of the Bonds of the Company in the amount of up to EUR 25,000,000 and (ii) admission of the issued Bonds of the Issue to trading on the First North Bond List of Nasdaq Vilnius First North.

The proceeds of all Tranches of the Bonds will be used to re-finance existing loans of the Group companies as well as to finance the construction of 10 MW PV project in Poland.

The offer of the Bonds of Tranche 1 is not subject to any underwriting agreement on a firm commitment basis.

To the extent the Issuer is aware, no person involved in the Offering of the Bonds has any material conflicts of interest pertaining to the offer or admission to trading.
